

ABHISHEK MANIKANDAN

Business Analyst | Product Management | Regulated Financial Services
Glasgow, UK · +44 7799 258863 · abhimaniknair@gmail.com · [LinkedIn](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Business Analyst with over four years of delivery experience across regulated financial services and high growth consumer technology, with a strong foundation in compliance process analysis, data mapping, requirements definition and Agile delivery. As Associate Product Manager at Prodsmiths I led business analysis for India's first fully digital Asset Reconstruction Company platform serving 10+ institutional lenders, translating complex compliance and regulatory requirements into granular functional specifications and data mapping artefacts for legal, financial and valuation due diligence workflows. I designed SQL based data architecture replacing legacy reporting systems, wrote user stories and acceptance criteria using BDD aligned approaches, and consistently delivered against committed sprint scope across a one-year engagement.

CORE COMPETENCIES

AFC and Compliance BA: Compliance requirements translation, regulatory process analysis, due diligence workflow automation, data governance, audit readiness

Requirements and BDD: Behaviour Driven Development (Given-When-Then syntax), user story mapping, granular data mapping and transformation specifications, acceptance criteria, BRD and FRD authoring

Data Analysis and Architecture: SQL, ER data modelling, data element level mapping, legacy to target state data transformation, Mixpanel, Metabase, Excel financial modelling

Agile and Programme Delivery: Agile and Scrum, Jira, Confluence, sprint planning, backlog refinement, UAT coordination, stakeholder workshops

Stakeholder Management: C-level reporting, cross-functional collaboration, multi-stakeholder regulated environments, root cause analysis, escalation management, customer facing relationship ownership

PROFESSIONAL EXPERIENCE

Associate Product Manager · Prodsmiths

Nov 2023 – Dec 2024

India's first fully digital ARC debt recovery platform · regulated financial services · 10 institutional lenders

- Owned the product backlog and delivery roadmap across a one-year build, translating compliance and regulatory requirements into functional specifications for legal, financial and valuation due diligence modules.
- Conducted granular data mapping and transformation specification work, defining data element level requirements for borrower verification, collateral valuation and lender reporting workflows, moving legacy Excel based data flows into a structured SQL data architecture for the first time.
- Authored BRDs, FRDs, user stories and acceptance criteria using BDD aligned approaches, maintaining traceability from regulatory requirement through to delivered functionality.
- Led compliance workflow automation that reduced portfolio onboarding from 14 days to 48 hours, mapping current state processes against target digital state, identifying bottlenecks, and defining transformation requirements for engineering teams. Coordinated UAT cycles with business and technical teams.
- Designed SQL based entity relationship models replacing Excel reporting in use since 2008, enabling near real time performance monitoring and improving data accuracy for compliance and audit purposes.
- Ran sprint planning, backlog refinement and prioritisation with engineering, sustaining **92%** of committed scope across **24** sprints.
- Supported onboarding of **2** institutional lenders onto the platform, running requirement workshops and configuration walkthroughs with each lender's compliance and operations teams.

Associate Product Analyst · AppsForBharat (Sri Mandir)

Jul 2022 – Nov 2023

Joined as Product Analyst Intern, promoted to Associate Product Analyst · consumer devotional platform · over 10 million users

- Joined as an intern and was promoted to Associate Product Analyst within 5 months on the strength of analytics delivery and requirement ownership.
- Gathered and documented business requirements for CRM automation and retention features, translating stakeholder needs into user stories and functional specifications for engineering teams across 15 automated journeys.
- Built analytics pipelines in Mixpanel and Metabase tracking retention cohorts, lifetime value curves and funnel drop offs across over 5 million monthly events, delivering regular performance reports to leadership.
- Drove a 23% uplift in average order value through cross sell engine design with A/B tested pricing bundles, scoped and deployed within three weeks through structured requirements gathering and iterative analysis.
- Improved share to install conversion by 58% through funnel analysis, iterative experimentation and redesign of referral mechanics.

Relationship Manager · NoBroker

Oct 2021 – Jun 2022

Property technology marketplace · high volume customer facing sales and service

- Managed a portfolio of property owner and tenant relationships end to end, from requirement capture and shortlisting through to closure, working to monthly conversion targets.
- Maintained accurate pipeline and interaction records in the internal CRM, using stage level tracking to prioritise leads and forecast conversion.
- Handled escalations and documentation issues across the customer lifecycle, coordinating with operations, legal documentation and field teams to resolve blockers.

CRM Executive · Kapture CX

Jul 2021 – Sept 2021

Enterprise CRM implementation · BFSI and telecom clients

- Supported enterprise CRM implementation for BFSI and telecom clients, assisting with requirements documentation, workflow configuration and user onboarding.
- Analysed customer interaction and ticket data to identify service and compliance process gaps, contributing recommendations for workflow changes.
- Delivered user training sessions and post launch support to business users in regulated industries.

CONSULTING EXPERIENCE (MSC)

Delivered six industry consulting engagements at the University of Strathclyde for Deloitte, NHS England, StormID and WB Alloys Group. Projects covered financial modelling and DCF analysis, AI workflow optimisation, ISO 31000 risk management frameworks, life cycle assessment and machine learning analytics. Presented data driven findings and recommendations to stakeholder panels in structured consulting formats.

EDUCATION

MSc Business Analysis and Consulting · University of Strathclyde

2025 – 2026

BEng Electronics and Communication · Akshaya College of Engineering and Technology

2013 – 2017

First Class · 7.7/10

CERTIFICATIONS AND UPSKILLING

- AI Fluency, Anthropic Academy (2026)
- Fundamentals of Python for Data Analytics, Intellipat (2026)
- Product Management Career Accelerator, Growth School (2023)
- Power BI, Microsoft (in progress)

ADDITIONAL INFORMATION

Leadership: Welfare Officer, Poker Society, University of Strathclyde (2025 - 2026)

Languages: English, Hindi, Tamil and Malayalam: reading, writing and speaking proficiency in all four.

Interests: Chess, football and Formula 1.
